Varina side table

The VARINA table represents the women called “VARINAS” from the lands of Var, now known as Ovar - a city in Portugal. They left by train for Porto and Lisbon with a basket on a wheel on their heads, to sell fish. With cork as the base material, this side table has a wheel that supports the table top and represents the artifact that facilitates the transport of the basket on the head. The wheel is a circular pillow made with hand-interlaced felt waste. The VARINA side table comes in two sizes and its felt wheel is available in different chromatic options.

Celeste table

Inspired by a peasant, CELESTE table is composed of a wicker basket that rests on a marble cylinder finished off with a half-sphere. The coffee table represents a strong character that carries the basket on her back with the effort of her work. Thus, in an apparent balance challenge, the two simple geometric shapes are joined into a distinctive design that pays tribute to the farmworkers. The option of the table with the cork element symbolizes the grapes transported in the basket, representing the wine region such as Alto Douro, in Portugal.

Products

Flora small tables

FLORA is a set of coffee tables that refers to the plants that we offer to the ones we love. Each plant contains a unique signature in nature, so when we offer a plant we are communicating a special feeling to someone. FLORA tables exploit this act of give-and-take, so there is a similarity between taking care of the plants and taking care of the objects. These tables combine natural materials, such as dark cork that represents the soil and wood that symbolizes stalks and leaves.

Products

Magma coffee table

With a unique beauty, the MAGMA coffee table refers to the mineral substances found under the Earth's crust. Composed of a semi-sphere of agglomerated dark cork that evokes the earth's crust, MAGMA features a stone top with expressive veins. This surface portrays a peculiar narrative about the beauty of our planet, dynamic yet deeply fragile, highlighting what is important to care for and preserve - Nature.

Products

Dina & Dora chairs

DINA & DORA chairs honor the hard work of those who have tamed the land of the oldest wine region in the world - the Douro Valley. The structure of the chairs is inspired by the delicate outlines of the slopes and the seat refers to wine and grapes that generate the renowned Porto Wine. Dora & Dina are elegant and plain chairs, where you can have moments of sharing, tasting and contemplation, adapting themselves to formal and exquisite surroundings, as well as informal and recreative environments.

Alice chair

Without fear of the passage of time, ALICE is an iconic chair, light and elegant. With architectural inspiration, the chair is oriented vertically. The two hind legs are gossips, they are turned on themselves so they can talk. From this dialogue comes the twisting of the backrest that ensures comfort - their stories. The ALICE chair is stackable and comes in two different versions. Even simple and light, ALICE knows how to receive with nobility in the fine Portuguese way, being ideal for a wide variety of spaces. In each place, each ALICE will have a story to gossip.

Products
Pipo stool

PIPO refers to the traditional wood barrel used for the transport and storage of wine. The mobility of the product is associated to the commercial expansion of the wine and it is as if each person carried this cultural history when carrying Pipo. This piece is produced in agglomerated dark cork, referring to the tone of aged casks. This material makes the piece lightweight and slip resistant too. The rope emphasizes the old look and it can be produced in other colours, making it most fun and adaptable to environments and different tastes.

Products

Gago & Sacadura chairs

GAGO & SACADURA chairs honour the first aerial crossing of the South Atlantic realized by Gago Coutinho and Sacadura Cabral in 1922. Inspired by the shape of the aviator's helmet and with curved arms like the wings of a sea-plane, the chairs' upholstery rest on a platform of turned wooden beams, giving users the impression of taking off on an adventure. On their back is the inscription "1922, 8383 kms", recording this historic feat of the aeronautics. GAGO & SACADURA travel through spaces of familiar conviviality or metropolitan agitation, making each place memorable.

Products

Nel & Maria bedside tables

NEL & MARIA are side or bedside tables with an integrated lamp. They explore the genre issue, reinterpret craft techniques and have a human and humoristic character. The lampshade represents men and women straw hats, typical of the portuguese region of Baixo Minho. The drawers' handles accentuate the humorist intention, because Maria speaks too much and Nel is amazed with her speech. The drawers have illustrations of the belongings of the characters. Nel & Maria are destined for indoors and can adapt themselves to children, youngsters and adults.

Valentim sofa

VALENTIM is a sofa that refers to the nostalgia of the serenades dedicated to a maiden at the balcony. Its light and turned structure in solid wood interprets the architectural element of the balcony - a space to share moments of conviviality or of intimacy as a kiss. The sofa was designed to be attractive from any angle and the structure leaves the upholstery suspended. Its delicate curves welcome us and express the ideal serenity that makes any environment unforgettable.

Brand Concept

Smile with us

DAM appeals to emotions, simplicity and quality of life. The portuguese culture and the common everyday things are the inspiration. The motivation is to see people smiling with DAM!

Inspiration
**Portuguese
heritage**

We are just 20 kms from the Maritime Coast, 30 kms from the mountains, 40 kms from the airport. Besides this, 30 kms from us is one of the first wine-producing region of the world - the Douro Valle. And also a landscape and heritage that gives us energy and creativity, making us feel good. This is why our products reflect what surround us.

Design

The resident Designers

The products designed by the resident Designers are more than what meets the eye - each piece of furniture has its singular details and its own story.

Graduated in Design from the University of Aveiro in Portugal, Hugo Silva and Joana Santos are the resident Designers of the DAM brand. Their areas of intervention include equipment, graphic and web interface design and they develop integrated Design solutions, involving strategic thinking, identity and technology. Their passion to develop new objects and brands led them to be co-founders of the DAM brand.

Joana has a special taste for graphic design and craftwork and her work process has always a practical approach. Hugo does not relieve the sketchbook and seeks inspiration in the everyday things to his drawings. Together, they develop narratives and explore emotions through colours, forms, technologies and materials. The result are products with singular and creative details and an ecological approach.

Production

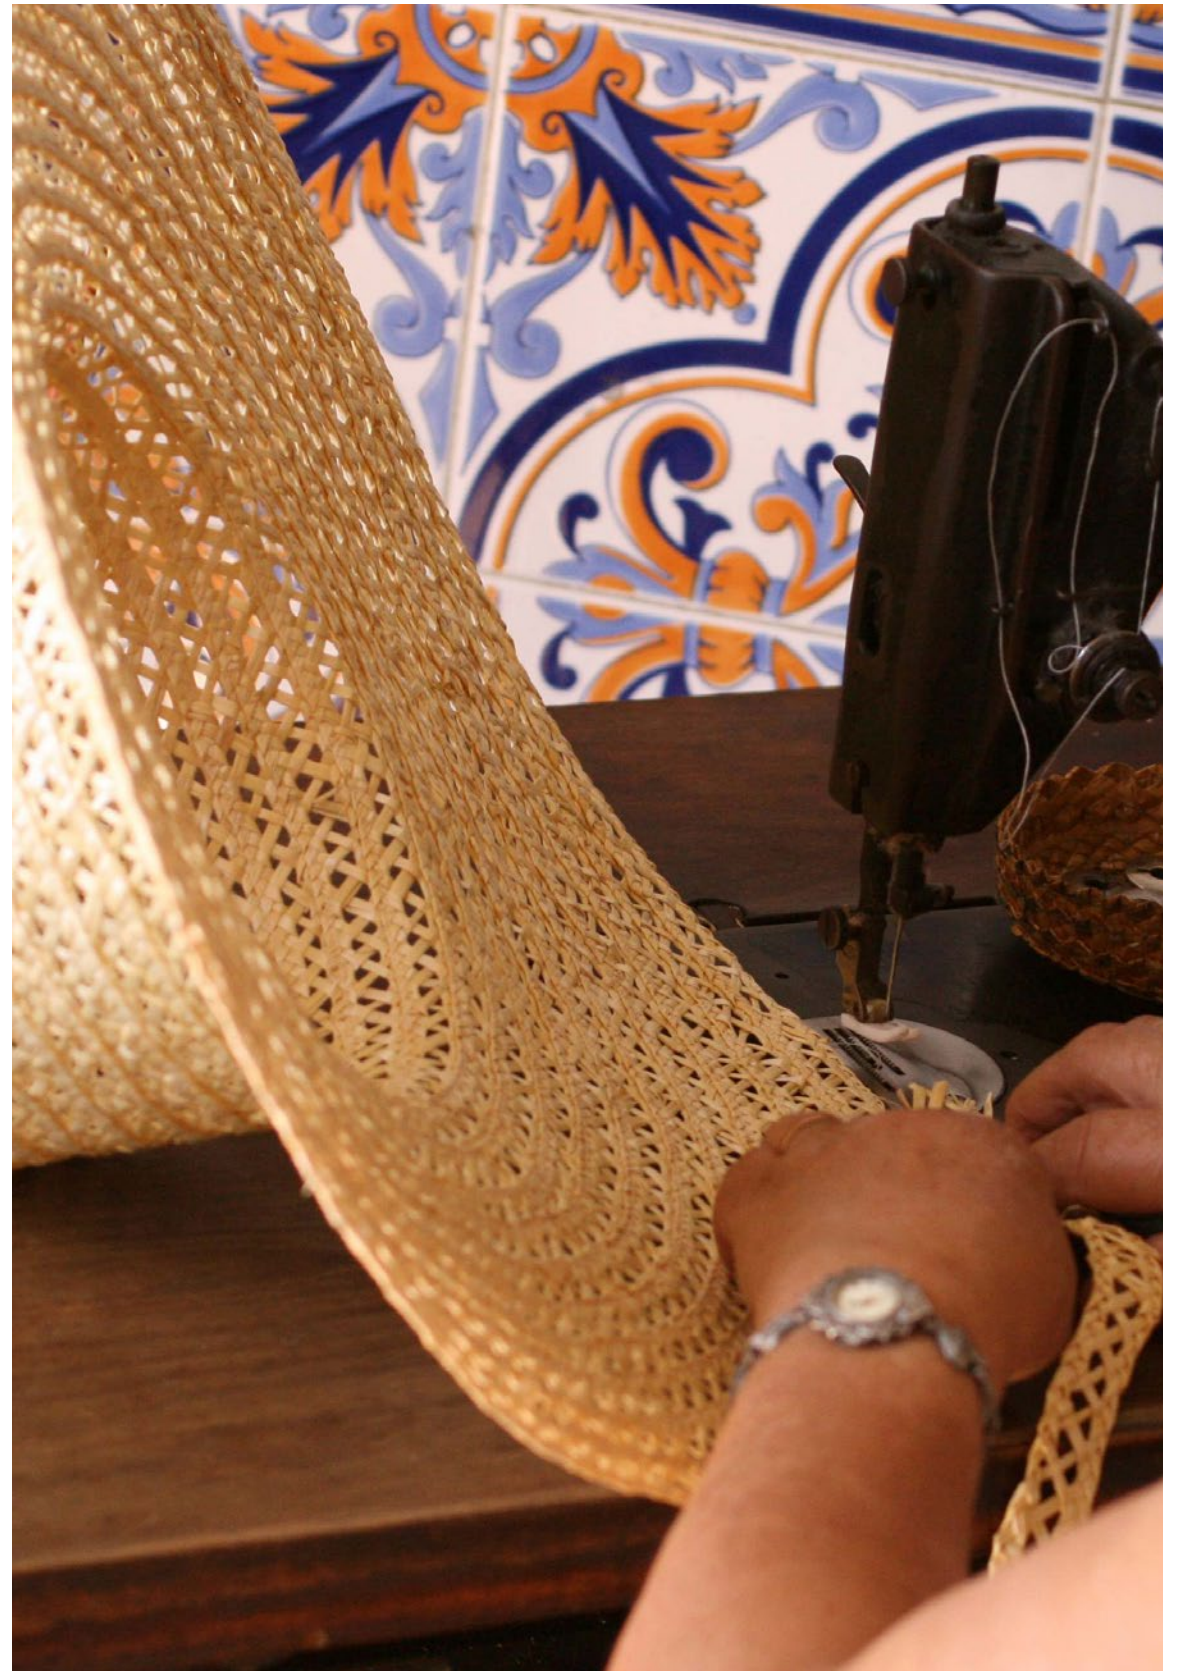

Made in Portugal with care

At Portugal there is an abundance of skills and know-how. There is also a collective heritage that stays genuine.

This is why we have passion for our country and a conviction: our location is special and our people makes the difference.

We work with socially responsible manufacturers that operate according to the highest ethical standards. And we work closely with people with different experiences that contribute to a shared goal that everyone is proud to believe in - to valorize what is done locally. Each piece results from local synergies between designers, artisans and industry. The challenge is to value what is done by hand, integrating new technologies and attitudes.

Our production monitoring involves care and precision. We know that there is no machine that can truly replace the hand or the eye, so we ensure the commitment to quality materials, technology and craftsmanship to produce beautiful and well made furniture. We push as well the boundaries of possibility, because we want to make pieces with strong personality that can withstand the everyday use.

Materials
Stone

The natural qualities of beauty, coloration, durability and easy conservation make Portuguese stone an efficient raw material. This industry in Portugal presents an extremely interesting in environmental and social sustainability: while extraction and transformation techniques are exceptionally competitive and of the highest quality, the more artisanal and manual techniques that are unique and irreplaceable have not been lost.

Name: Alpinina.
Origin: Leiria, Portugal.
Characteristics: Fine grained beige limestone, with stylolites and thin calcitic and ferruginous veins, tectonized and fairly recrystallized. Compression breaking load: 1150 kg/cm². Impact test: minimum fall H45 cm. Abrasion test: 1,9 mm.

Materials Wood

The wood comes from forests controlled through a custody protocol that includes plantation, logging and drying. The process is covered by the FSC Certification which guarantees wood originating from replanted and controlled forests. Wood can last a lifetime but it need some maintenance and care, because it is sensitive to variations in temperature and humidity.
